

Knowledge and Understanding of the world

This half term we will be finding out about and identifying some features of living things such as sea creatures. We will be looking at information on sea creatures from non-fiction texts and off the internet.

One thing we would like the children to develop is to ask more questions about why things happen and how things work. If the children have any questions about our topic we will share and display them on our learning wall.

The children will be involved in building and constructing objects such as making a light house outside as well as in our junk modelling, construction and big blocks areas.

The children will continue to develop their ICT skills using the computers in the ICT suite and our class camera.

We are going to have a school visit to the coast to observe, find out about and identify features in the place they live and the natural world (Information about the trip to follow).

We will also be finding out about how to book holidays and what a travel agents job involves. (If anyone works as a travel agent we would find it very interesting to hear from you).
